MARINELOG

FERRIES 2009

North America's largest annual ferry conference & expo

November 3 & 4, 2009

Renaissance Seattle Hotel, Seattle, Washington

The Obama Administration has made it clear that climate change is high on its agenda. Public ferry transportation could very well be thrust in the spotlight as coastal cities and those located near bodies of water look to shrink their carbon footprints to comply with increasingly more stringent air emission regulations.

For ferry infrastructure, the Administration included more than \$67 million in grants as part of the American Reinvestment and Recovery Act of 2009.

That's why when you examine the agenda for **FERRIES 2009 Conference & Expo**, you'll notice a strong emphasis on ferry development and technologies, funding and the environment.

Among the topics that will be explored:

- ▶ Expanding a public ferry system
- ▶ Hybrid passenger ferry

- ▶ Ferry boat grant program
- ▶ Improving vessel efficiency
- ▶ Operation on biodiesel

Another thing you'll notice is our new venue—Seattle, which is home to Washington State Ferries, the largest public ferry system in the U.S.

The conference will also include an exposition, as well as several networking opportunities such as coffee and energy breaks, luncheons and a cocktail reception.

We look forward to seeing you in Seattle!
