

ALTERNATIVE FUELS INSIGHTS

Monthly status on alternative fuel vessel orders from DNV

Alternative fuelled vessels added this month

According to the latest figures from DNV's AFI platform 27 new orders for alternative-fuelled vessels were registered in November 2024.

Current status

Percentage of fleet using conventional vs. alternative fuels

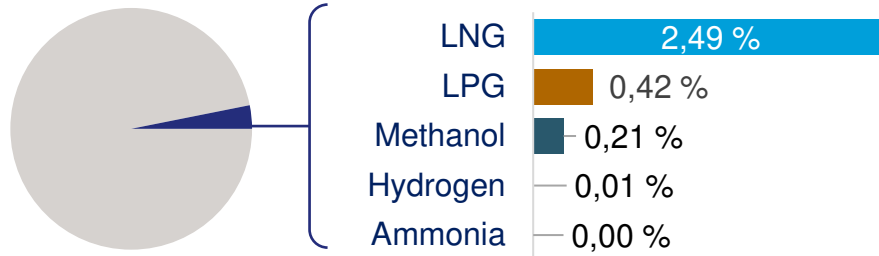

In operation

On order

Gross tonnage

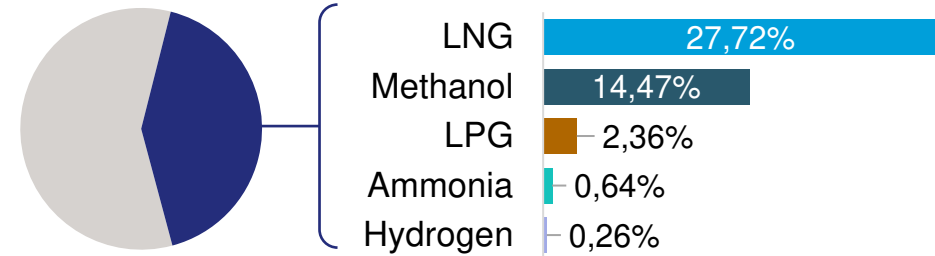

Conventional: 96,87%

Alternative: 3,13%

Conventional: 54,56%

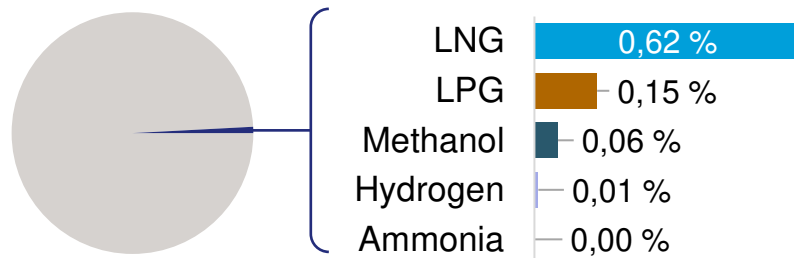

Alternative: 45,44%

Number of ships

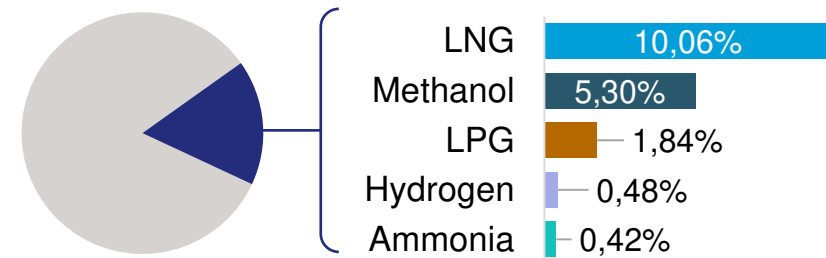

Conventional: 99,16%

Alternative: 0,84%

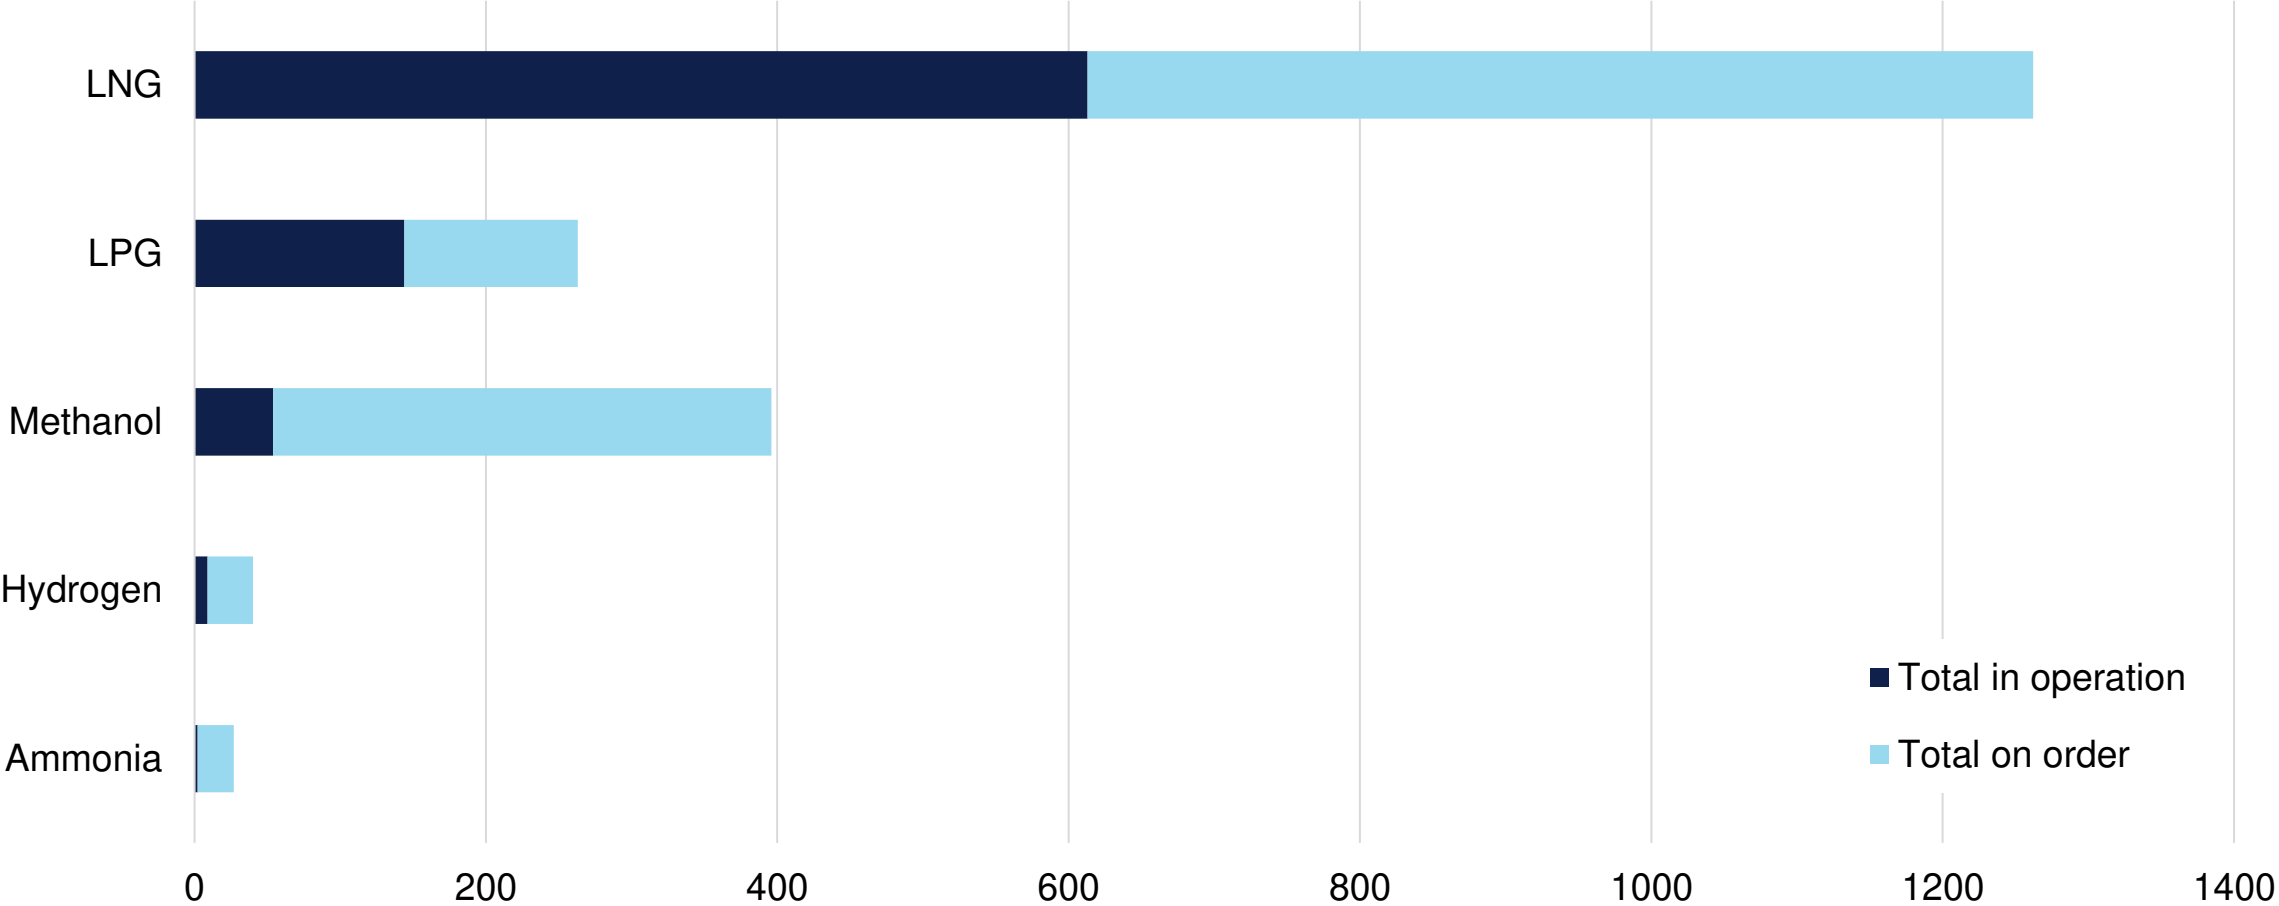

Conventional: 81,90%

Alternative: 18,10%

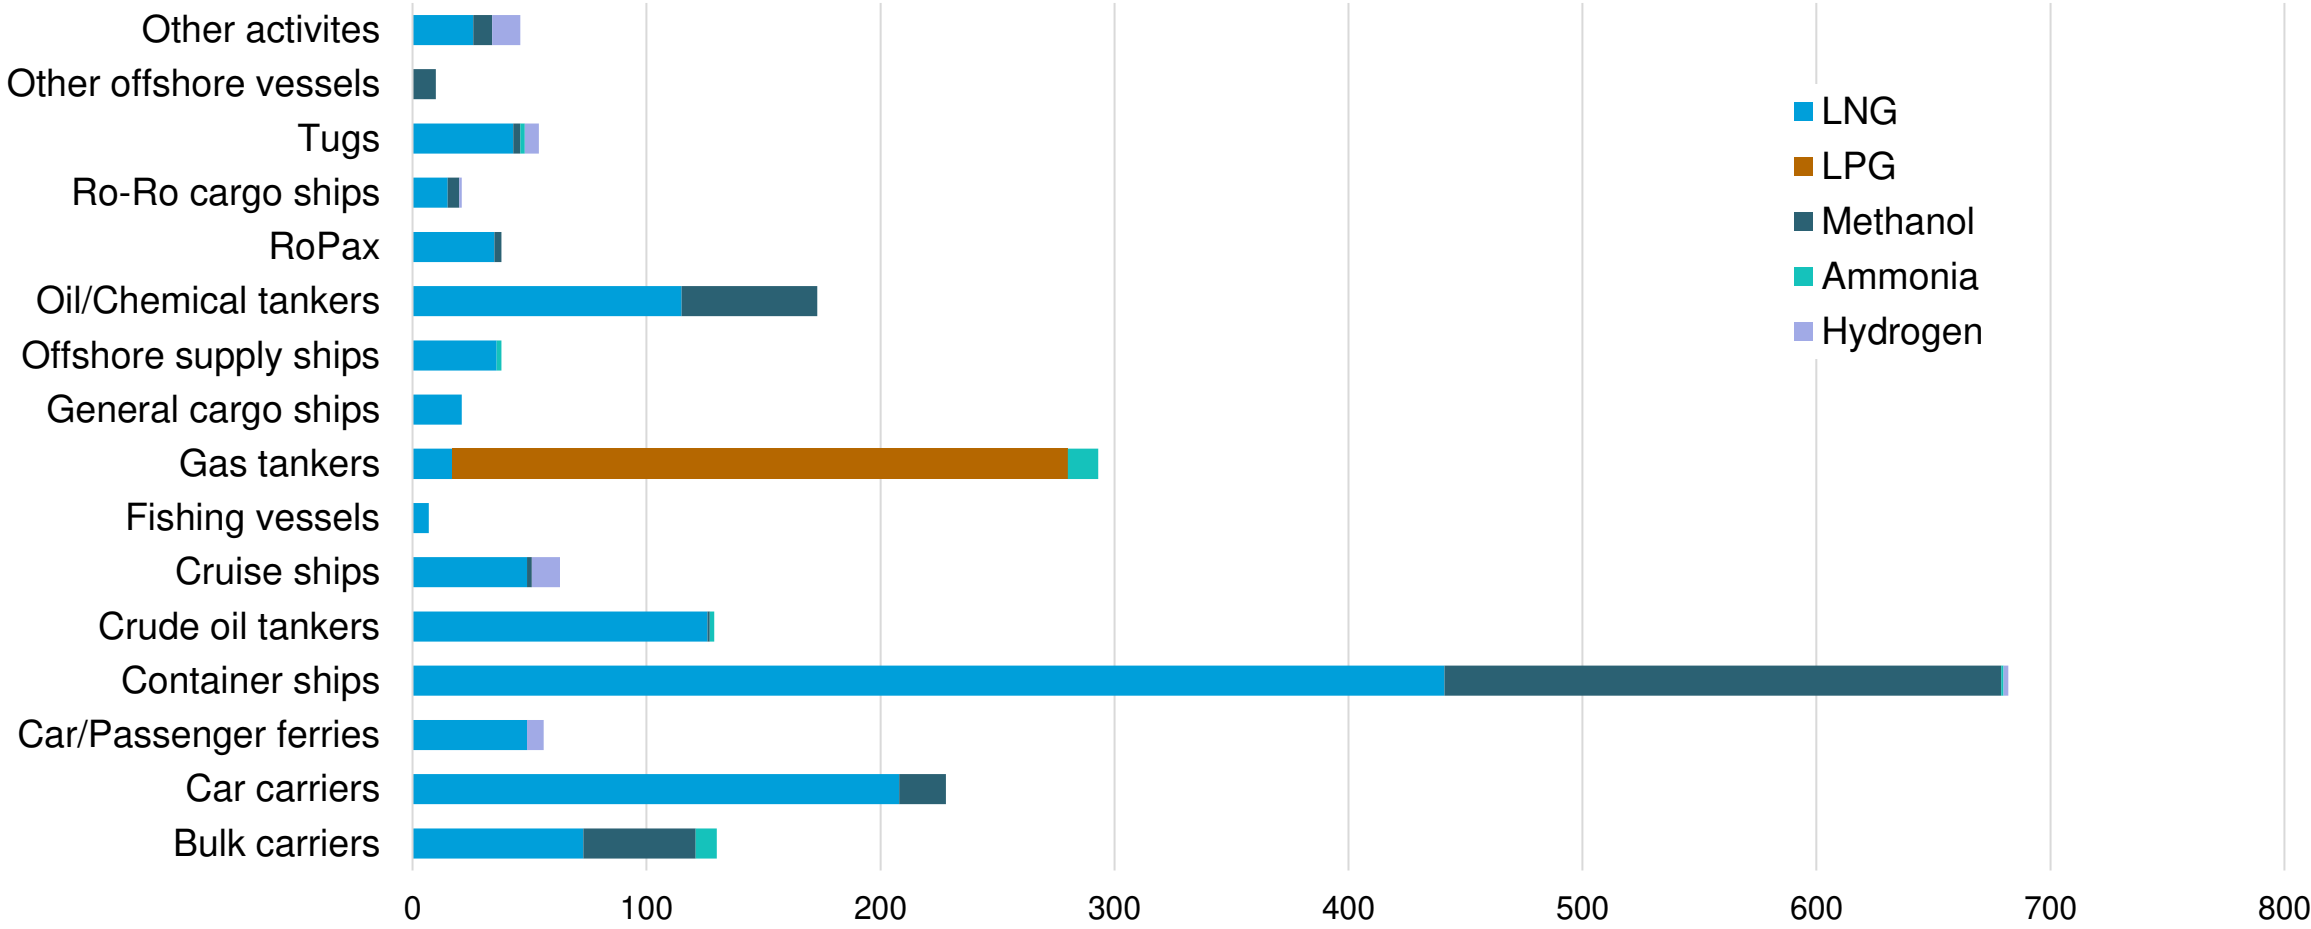

Distribution of alternative fuel fleet

Vessel by fuel type | Number of ships in operation and on order

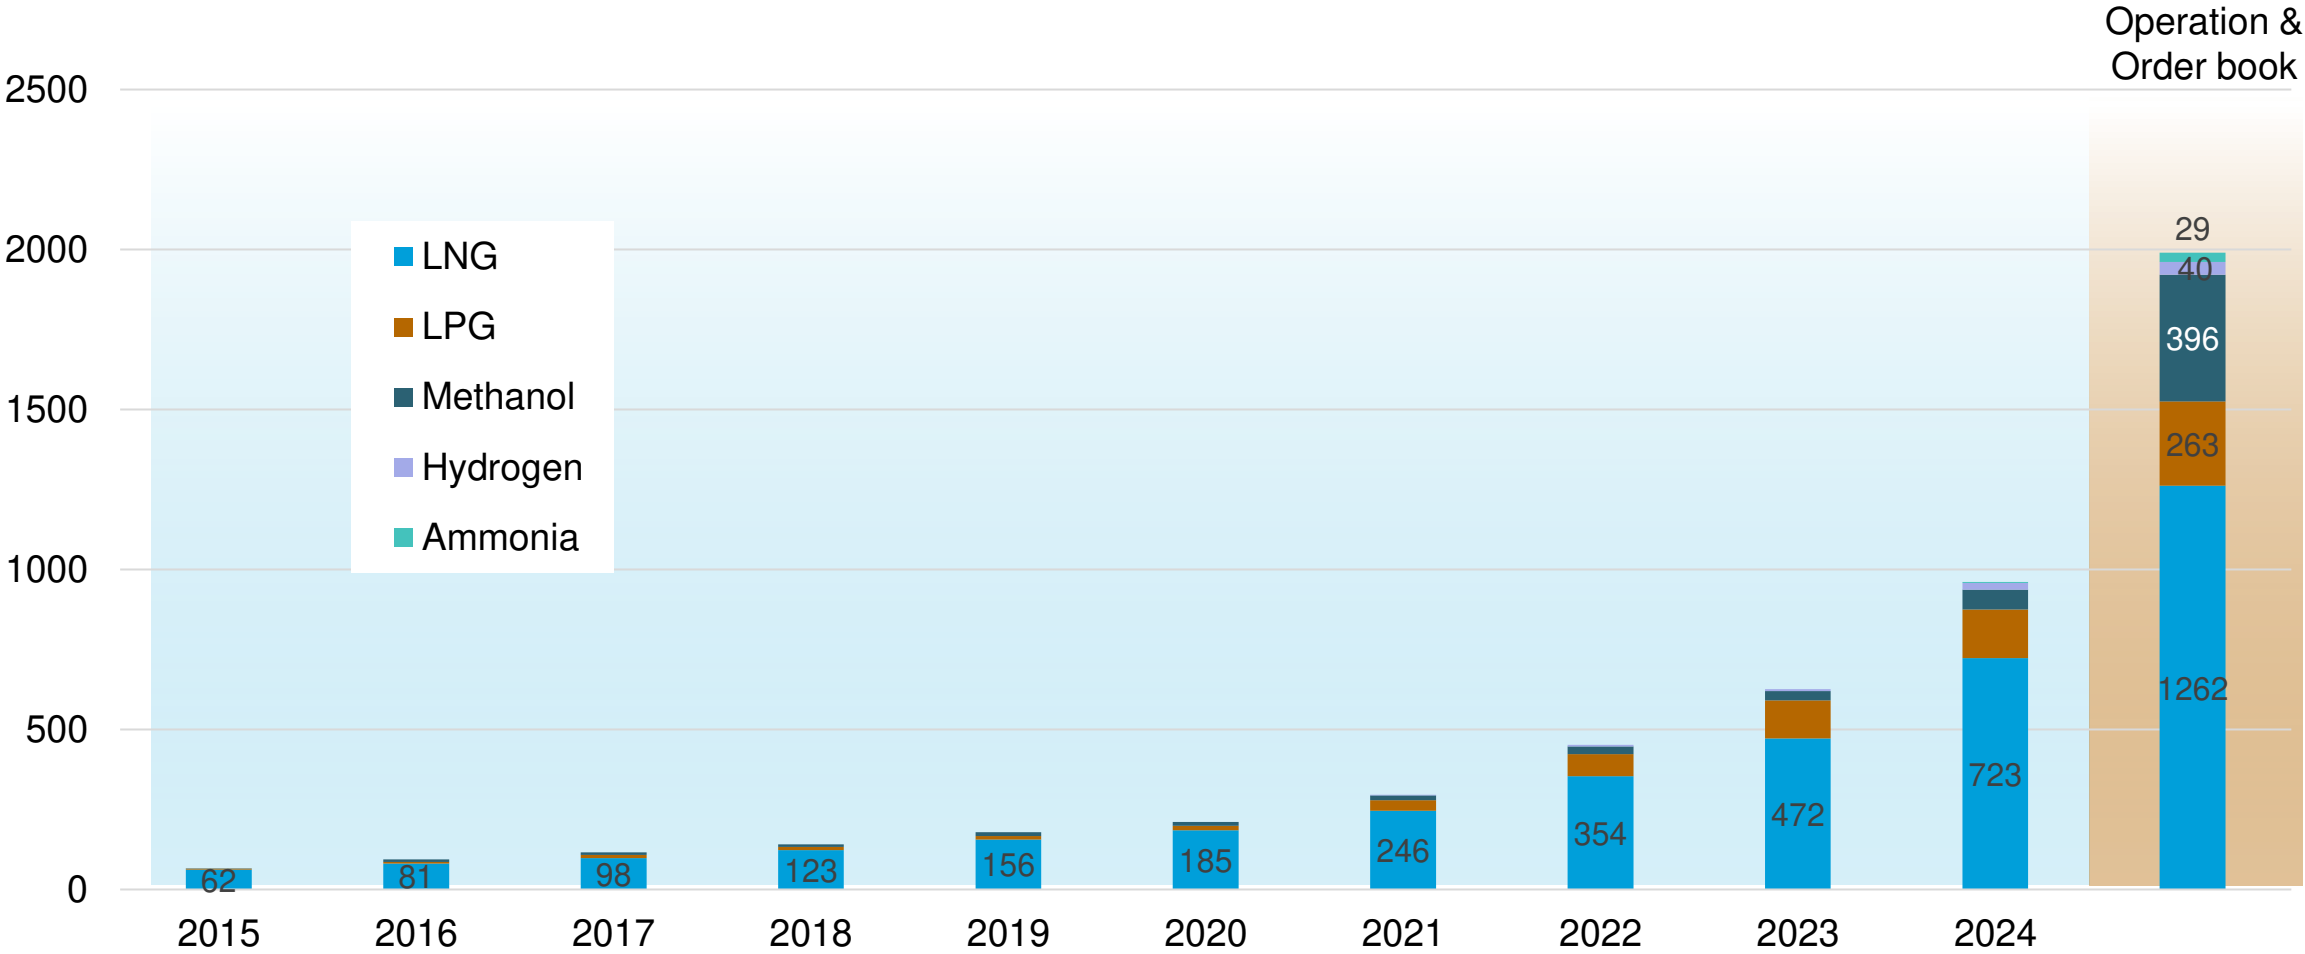

Distribution of alternative fuel fleet

Alternative fuel uptake by ship type | Number of ships in operation and on order

Growth of alternative fuel uptake

Number of ships in operation and on order, excluding LNG carriers

About AFI

With more than 15 000 users across the maritime industry, **DNV's Alternative Fuels Insight platform** is here to help accelerate shipping's transition to a cleaner, more sustainable future.

Covering both alternative fuel technology for vessels and bunkering infrastructure, the platform provides a complete overview of the development and uptake of alternative fuels and technologies.

The platform is open for everyone to access through DNV's **Veracity portal**.
